<p>Determination of Area Calculations for Permit Fees For the purpose of calculating the cost of permits, the following method establishing square footage shall be used:</p> <ol style="list-style-type: none"> 1. Each floor area shall be measured between the outside surfaces of exterior walls, or between the outside surfaces of exterior walls and the centre line of Firewalls or Party Walls. For structures like mezzanines, decks/porches and loading docks, the area shall be measured between the platform edge to platform edge, or between the platform edge to an abutting wall face. A basement or a crawlspace contained in whole below grade, and with no interior finishes installed, or where no use is proposed shall not have a permit fee applied. 3. All walkout basements in dwellings shall have half of their Total Area calculated for the applicable permit fee. 4. No deductions shall be made for openings within a floor, i.e. stairwells, elevator shafts, service shafts (ducts, etc.). 5.
